

503 Motoring and The ORPCA present

The Porsche – PreSpring Prep Event

Join 503 Motoring and The ORPCA for an evening of fun and information on February 23rd from 6:00 – 8:00 PM at 5703 SW Arctic Dr. – Beaverton, OR 97005.

Come and check out 503 Motoring and learn about services and products that will prepare you and your Porsche for the upcoming spring and summer.

In this open forum we will talk BREMBO braking upgrades with Bob Chmelka from Race Technologies in California. Also joining us will be ESCORT's National Director of Sales, Brady Siebert to talk about the newest tech offerings in radar/laser defense for your vehicle. Other topics for the evening include paint correction and protection as well as vehicle appraisals and valuations. Come and find out how to protect yourself, your investment and your Porsche with 503 Motoring.

TOPICS & GUEST SPEAKERS:

RACE TECHNOLOGIES and BREMBO

503 Motoring will be bringing in Bob Chmelka from Race Technologies in California for the event to talk about Porsche applications and the newest offerings from BREMBO

Race Technologies is the direct source for Brembo High Performance (HP) Braking Products in North America. Race Technologies currently offers

over 650 Brembo High Performance Brake Applications, including more than 1,200 Sport Discs and Performance Pad Applications.

Race Technologies is the leading performance brake supplier to the most accomplished names in the automotive industry. Our products are chosen by championship winning race teams and distinguished automotive tuners.

Whether you are a race team looking for the winning edge, a company interested in building a successful brake program or a an automotive enthusiast looking for the best, we are your Brembo source.

Brembo is the leading brand in design and manufacturing of braking systems for high performance cars and motorcycles, both street and competition, as well as commercial vehicles. Performance, Comfort and Design are the values which distinguish the brand and make Brembo products the most prestigious braking systems and components in the world.

ESCORT RADAR/LASER DEFENSE

Headquartered in metro Cincinnati, OH, ESCORT Inc. has been designing, engineering, and manufacturing industry leading radar/laser detectors and premium automotive accessories right here in North America for over 30 years.

ESCORT has the finest engineers, a state of the art manufacturing facility and a focus on quality that is second to none.

ESCORT has sold more than 10 million detectors and automotive products that help you Drive Smarter. Their goal is to exceed your expectation on every unit we sell.

Brady Siebert is the National Director of Sales for ESCORT and will be at the event to speak about the PASSPORT 9500ci and the rest of the radar/laser defense systems offered by ESCORT.

The PASSPORT 9500ci is the ultimate custom-installed radar and laser defense system. With blistering all-band radar protection and precise laser

"shifting" technology, speeding tickets can be a thing of the past. ESCORT continues to lead the industry by incorporating its patented GPS technology that automatically identifies the source and location of all radar signals. Real threats are processed in less than a second, while false signals are learned and eliminated. Now all you have to do is drive!

The PASSPORT 9500ci is completely undetectable to all radar detector detectors, keeping you unseen and unnoticed. Crystal-Clear Voice Alerts, Speed Alert™, Safety Warning System and its stealth installation make the PASSPORT 9500ci the ultimate in discreet protection.

The PASSPORT 9500ci also comes pre-loaded with thousands of safety camera locations, including red light and speed-based cameras throughout North America. You can also download updates, back up your data, and stay on top of new threats directly from our website.

The Passport 9500ci includes our proprietary Traffic Sensor Rejection (TSR) software to eliminate false alerts.

503 MOTORING – PAINT CORRECTION SERVICES

Thomas Dekany is an internationally recognized detailer and paint correction specialist, well known for his amazing detailing skills and paint care knowledge. Thomas will Demonstrate Paint Correction and speak about detailing and the care of your car at the event.

When you call 503 Motoring for your detailing needs, you call Thomas Dekany. All of the work is done by Thomas himself. Being a perfectionist, he feels that this is the only way he is able to provide exceptional service each and every client deserves. Mr. Dekany believes that by utilizing superior detailing skills, using world class car care products and the highest standards, the results will always be truly amazing.

Paint Correction is an art form. Most detailers have never heard of it, don't know what it means or how it is done. The small number of detailers who correct paint are the true masters in this trade. While each vehicle's condition is different, in general, the process is time consuming because

you are removing trace amounts of clear coat to level the paint. But the benefits are clearly visible. No more spider webbing, holograms or swirls, the paint basically will look brand new. (If your detailer buffed out your car in 5 hours you are in trouble!) *503 Motoring and Thomas Dekany offer world class results.*

503 MOTORING – 3M PAINT PROTECTION FILM

For over 10 years 503 Motoring has been providing behind the scenes clear mask and clear bra installation for all major vehicle brands. We have had the distinct pleasure of working on some of Portland's most elite clientele and have enjoyed building these relationships. At 503 Motoring you will experience the quality of the best made Paint Protection Film from 3M™ and the award winning pre cut patterns from X-pel and ProForm. We have taken these measures to insure a perfect fit and zero damage install from bulk film applications.

503 Motoring uses 3M™ Scotchgard Paint Protection Film. Scotchgard Paint Protection Film maintains the beauty and integrity of automotive finishes on vulnerable exterior surfaces such as leading hood edges, fender end caps and rocker panels. This rugged urethane film helps protect against stone chips, bug damage, abrasion and weathering. The clear-coated urethane film provides superior appearance, high-gloss finish and resistance to yellowing and staining. 3M™ Scotchgard Paint Protection Film is transparent and nearly invisible, and it does not alter vehicle appearance.

AUTO DAMAGE EXPERTS

David Smith is the Vice President of Operations for Auto Damage Experts, Inc., one of the nation's original Auto-Body Repair Inspection and

Diminished Value Assessment service providers. David Smith will join the event to speak about the array of services that they provide automotive enthusiasts and owners. David know that you care about the car that you drive and knows the ins & outs of protecting your investment.

ADE offers numerous automotive related forensic services including Diminished Value, Pre-Purchase Inspections, Post Repair Inspections, Collision Repair Consulting, various Appraisal Services and more.

Auto Damage Expert's clientele includes the general public, legal professionals, insurance carriers, financial institutions, fleet administrators and collision repair facilities across the country

David is recognized and respected throughout the country as an Expert in the field of collision repair and various disciplines within auto appraisal activities including Diminished Value and Total Loss valuations and related claim resolution. He has personally been involved in thousands of auto body collision/cosmetic repair related activities from management of body shops, vehicles he's repaired, and vehicles in which he has inspected, evaluated and rendered his Expert opinion.

Auto Damage Experts was founded and continues on the fundamental principle of making exceptional automotive related professional services available to all parties: including but not limited to the individual consumer, insurers, legal professionals, corporations, and governmental agencies.

David is ASE certified; I-Car trained and is a Certified Oregon Automotive Appraiser. The Northwest office utilizes both Audatex and Mitchell Ultramate estimating. David has helped thousands successfully navigate through the confusing maze that is Insurance Claims, Auto Purchasing and Collision Repair.
